Proceedings of the 15th International Workshop on Laser Ranging

Extending the Range

October 15-20, 2006
Canberra, Australia
Sponsors

International Laser Ranging Service
The International Laser Ranging Service (ILRS) provides global satellite and lunar laser ranging data and their related products to support geodetic and geophysical research activities as well as IERS products important to the maintenance of an accurate International Terrestrial Reference Frame (ITRF). The service develops the necessary global standards/specifications and encourages international adherence to its conventions.

Geoscience Australia, Australian Government
Within the portfolio of Industry, Tourism and Resources, Geoscience Australia plays a critical role by producing first-class geo-scientific information and knowledge. This can enable the government and the community to make informed decisions about the exploration of resources, the management of the environment, the safety of critical infrastructure and the resultant wellbeing of all Australians.
