

Session 8: SLR Technology and Safety: Summary Report.
Chairs: G. Appleby / G. Kirchner
(together: 127 years 😊)

Technology

- **NGSLR has now reached a mature status. Approaching operational status ...**
- **Divergence estimation procedures are going on; to achieve progress, at least a few SLR stations will start to test these new procedures, and to build some data base; NEWG will try to push / coordinate**

Safety

- **ADS-B systems are now operational in several SLR stations;**
- **Detailed knowledge about installation / application is now available; can / should be used by other stations; knowledge can / should be exchanged**

Hazards

- **Backups are not always available; take care of backups ;**
- **In case of problems: NSA also might have a backup 😊**
